

## Science Review

Fill in metric ladder:

Metric Conversions:

1.  $3.0 \text{ M} = \underline{\hspace{2cm}} \text{ cm}$

2.  $8.45 \text{ L} = \underline{\hspace{2cm}} \text{ kL}$

3.  $1.08 \text{ m} = \underline{\hspace{2cm}} \text{ mm}$

4.  $1500 \text{ ml} = \underline{\hspace{2cm}} \text{ m}$

5. What is the formula for determining the volume of a rectangle or square?

6. What is the volume of this rectangle? The height is 5, the width is 10, the length is 11.

7. If you were to measure the volume for a quantity of sand, which instrument would be best to use?

- a.) Graduated cylinder
- b.) beaker
- C.) Ruler
- d.) meter stick

8. Which of the following choices correctly places the units in order from LARGEST to SMALLEST.

- a.) Cm, km, m, mm
- b.) Km, mm, cm, m
- c.) Km, m, cm,mm
- d.) Mm, cm, m, km

9. What is the volume of the solid object in the diagram below:

Fill in the volume in the blanks above each graduated cylinder. What is the value of the graduated cylinder?

20. \_\_\_\_\_

21. \_\_\_\_\_

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

4. \_\_\_\_\_

x

22. Calculate the volume of the object below:

Calculate the volume of the cube:

The two objects shown in the beakers below are exactly the same size (same volume). What are the mass and the volume of the floating object?

---

What is the measurement of the object on this triple beam balance? \_\_\_\_\_
